**NAME**: Meet Raut

**DIV**: S21

**ROLL.NO: 2201084** 

## **Experiment 1:**

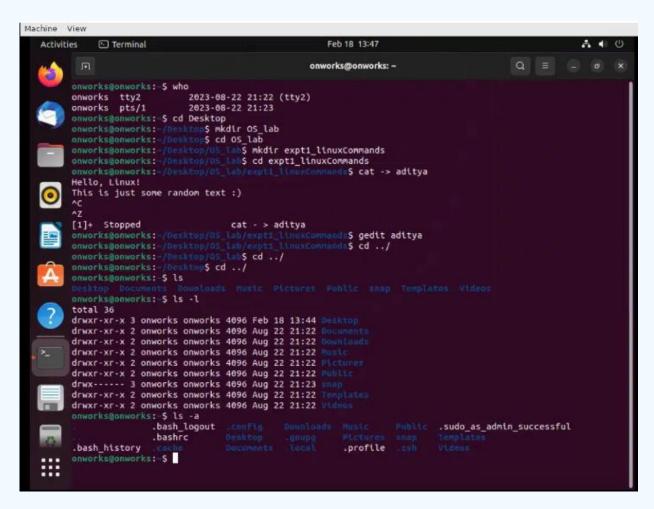

• <u>AIM:</u> Explore usage of basic linux commands and system calls for files, directory and process management.

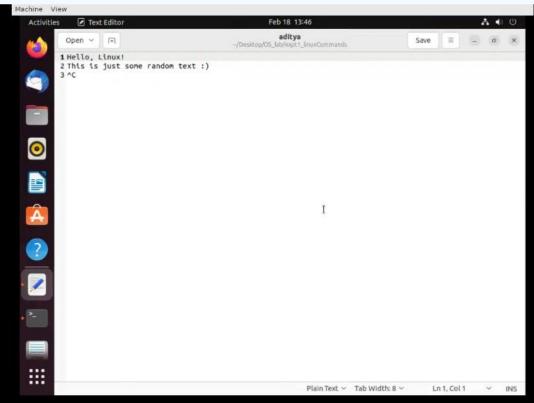

## • THEORY:

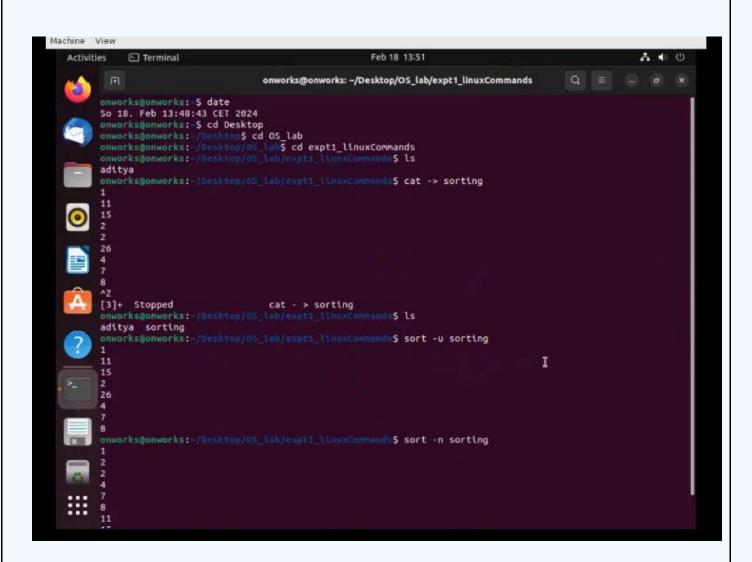

- **1.** who: it is used to find out the current user who is logged into the system.
- **2.** pwd: present working directory, lets you know the current directory you are in.
- $\underline{3}$  cal: show the calendar of the complete month.
- $\underline{\mathbf{4}}$  date: It shows you the current date, along with the time, along with the day, along with the year.
- **<u>5.</u>** mkdir: to create a new directory under any directory
- **<u>6.</u>** chdir/cd: to change the current working directory
- $\underline{\underline{\mathbf{7}}}$  cat: to create the file and display the contents of the file
- **8.** chmod: to change the mode of the file. There are three modes read(r), write(w) and execute(e)
- **9.** ls : to list all directories and subdirectories
  - **a.** ls-l: to show the long listing information about the directory
  - **b.** ls-lh: human readable format.
  - **<u>c.</u>** ls-ld : shows the details of the directory content.
  - **d** ls-d\*: to show the sub directories in a directory
  - **e**. ls-a: to show hidden files
  - $\underline{\underline{\mathbf{f}}}$  ls-lhs: show files in the descending order in which you have used your files.
- 10. sort-r file name.txt : sorts the list in reverse order
- 11. sort-n file name.txt: its sorts the numerical list in ascending order
- **12.** sort nr file name.txt : its sorts the numerical list in reverse order
- **13.** sort u file name.txt : to remove the duplicates
- **14.** sort m file name.txt : Sorts the months in ascending order
- $\underline{15.}$  awk: it is used for the user that defines text patterns that are to be searched for each line of the file.

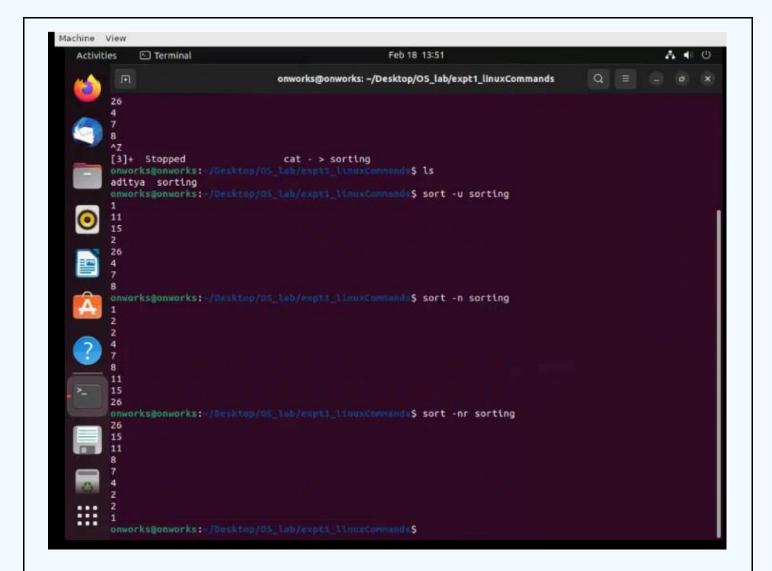

Syntax, awk '{print}' file name.txt awk
'/faculty/{print}' file name.txt: awk
'{print}NR, \$0}' file name.txt:
NR - specifies the number of lines.

## • SCREENSHOTS:

• <u>CONCLUSION:</u> Thus, we have successfully explored and implemented usage of basic linux commands and system calls for files, directory and process management.
